the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office of National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including an increase in life expectancy, a decrease in the birth rate, and an increase in the number of people who are aged 65 and over who are not in the workforce.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's economy and society. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for social services, including housing, health care, and social care. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for retirement income, which is expected to be met by a combination of state pensions and private pensions.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for housing. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for housing that is suitable for older people, including housing that is accessible, affordable, and close to social services. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for housing that is close to public transport and shopping facilities.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for health care. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for health care services, including general practice, hospital care, and social care. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for health care services that are tailored to the needs of older people, including services that are designed to prevent illness and promote health.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for social care. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for social care services, including care in the community, care in residential care homes, and care in nursing homes. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for social care services that are tailored to the needs of older people, including services that are designed to prevent illness and promote health.

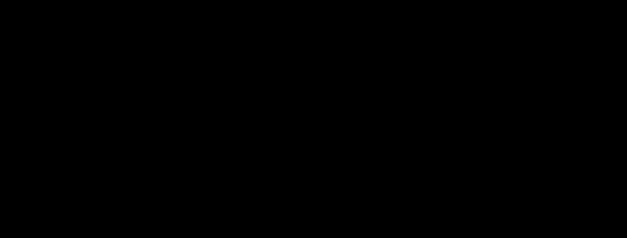

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for retirement income. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for retirement income, which is expected to be met by a combination of state pensions and private pensions. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for retirement income that is tailored to the needs of older people, including income that is designed to prevent illness and promote health.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for housing that is suitable for older people. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for housing that is suitable for older people, including housing that is accessible, affordable, and close to social services. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for housing that is close to public transport and shopping facilities.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for health care services that are tailored to the needs of older people. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for health care services that are tailored to the needs of older people, including services that are designed to prevent illness and promote health. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for health care services that are close to public transport and shopping facilities.

The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for social care services that are tailored to the needs of older people. The increase in the number of people aged 65 and over is expected to lead to an increase in the demand for social care services that are tailored to the needs of older people, including services that are designed to prevent illness and promote health. The increase in the number of people aged 65 and over is also expected to lead to an increase in the demand for social care services that are close to public transport and shopping facilities.
